Dan is the partner-in-charge of Habif, Arogeti & Wynne's IT Audit and Assurance Services practice. Dan has over twenty years experience in IT risk management functions, and over nine years leading IT Audit & Assurance functions at leading regional CPA firms. Dan is actively involved in delivery and practice development in several areas including:

- IT Audit and Attest, such as SAS 70 / SSAE 16 readiness and audits, SOX 404 IT audits, IT support for financial audits.
- Security and Privacy risk assessments and compliance audits.
- Governance and CIO Services such as Enterprise IT Risk Management Program Definition and Deployment, Application and Service Provider Due Diligence, Vendor Management, etc.
- Business Performance Improvement such as business process and workflow assessment and design, technology alignment, scorecard and performance evaluation systems.

Dan has also managed and participated in numerous IT Governance and technology risk management initiatives for insurance, healthcare, banking, and other industries for both public and private companies. These initiatives have included assessment and improvement of operational, financial and compliance related controls, as well as design and deployment of Business Continuity and Disaster Recovery Planning functions.

In addition to his CPA firm leadership roles, Dan has extensive technology and process management experience in many industries. Dan's twelve-year tenure with NCR Corporation included management roles in several operations and corporate positions, including World Wide Logistics and Materials Management, Supply/Demand Planning, and Financial Systems Development and Deployment. For six years Dan worked with a leading provider of mid-market ERP solutions, RF Data Collection applications, and EAI (i.e., intelligent middleware) where he assisted dozens of mid- and large-sized companies in their implementation of key enabling technologies. These experiences enabled Dan to gain deep insight of practical and effective approaches to using technology as an enabler of business performance improvement.

Dan is a member of the American Institute of Certified Public Accounts (AICPA), the Georgia Society of CPAs, the Information Systems Audit and Control Association (ISACA), and the Institute of Internal Auditors (IIA). Dan is the Chairperson of the AICPA Information Technology Executive Committee and serves on the AICPA Assurance Service Executive Committee Task Force for Data Integrity and Trust Services reporting. He received his MBA with honors from the University of Dayton, and a BA in Accounting from Morehead State University. Dan is a frequent speaker and author on IT risk management subjects including SAS 70, technology risk management and financial IT auditing. Recent and planned speaking engagements include:

- AICPA Audit School (2008, 2010)
- AICPA National Advanced Auditing and Accounting Technical Symposium (2009, July 2010)
- Georgia Society CPAs Annual Convention June 2010
- AICPA TECH+ 2008 conference.
